 Backwards compatibility with SirAud 1.02 7

 Fixes in SirAud 1.04 but not in 1.02 7

 Version co-requisites 7

CHAPTER 1 ***Introduction***

This document lists the enhancements and other changes contained in the newest release of *SirAud*: version 1.04. The previous generally released version of *SirAud*, 1.02, was released in April, 2000.

CHAPTER 2 *Maintenance and Support*

CHAPTER 3 ***New Features*****3.1 Model 204 support**

This version of *SirAud* contains support for Model 204 Version 5.1.

Support for Model 204 Versions 2.2, 3.1, and 3.2 has been dropped in this release.

This section lists any compatibility issues with *SirAud*, and any fixes contained in this version of *SirAud* but not, as of the date of this release, in the immediately prior version (1.02).

4.1 Backwards compatibility with SirAud 1.02

This section lists any differences in processing that result from execution with *SirAud* version 1.04, as compared with the same inputs to *SirAud* version 1.02 at current maintenance levels.

Since we believe that customers may “parse” the reports of *SirAud* for various purposes, including tracking changes of *Model 204* activity, we try to be thorough in our mention of compatibility issues, even including changes to report formatting.

4.2 Fixes in SirAud 1.04 but not in 1.02

This section lists other fixes to features existing in *SirAud* version 1.02 but which, in absence of customer problems, have not, as of the date of the release, been fixed in that version.

There are no such problems which have not been fixed in version 1.02.

4.3 Version co-requisites

This section lists any restrictions on usage of various products (including *SirAud* itself) which will be imposed by use of version 1.04 of *SirAud*.

There are no version co-requisites.
